

LO[®]

LO Locker[®]

Product information sheet

Product range

LO Locker is fitted with a choice of two, three or four compartments. The modules provide plenty of storage space – so that even rucksacks and laptops fit comfortably. The doors open downwards, creating a temporary workspace with a maximum load of 15 kg. For easier access, in the four-compartment version the top door opens upwards. The open base provides additional storage for shoes or sports bags and creates the appearance of lightness.

Details

LO Locker offers a range of highly practical optional accessories, such as the integrated power supply that transforms the storage system into a docking station or the code system to prevent other people from gaining access to stored items, plus a pass key and code finder for high ease of use. The LO Locker compartments can be personalised with locker plates and labels.

Electronic Closing (battery-supported)

Electrical system

Cable conduit on base
